

## RING SIZE GUIDE

### Print Settings

To get best results, make sure you are printing at 100% scale. To be sure you have printed the Ring Size Guide properly, you can measure this sample: it should measure exactly 4 cm.

### MEASURE YOUR FINGER

The size of a ring can vary depending on its manufacture and on the presence of precious stones. You can find out your correct ring size by accurately measuring the diameter of a ring you usually wear or by following our Size Chart below.

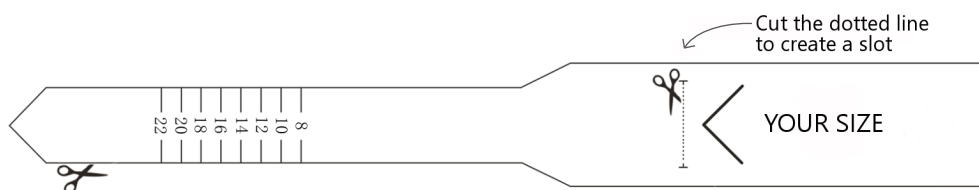

Remember that our hands are not identical, so a ring that usually fits a finger of your right hand could not fit the same finger of your left hand.

Ring fit can vary depending on the time of the day and the weather. It is preferable to measure your finger at the end of the day, better if when the weather is not too cold or too hot. While measuring your finger, make sure you leave enough room for the ring to pass along the entire length of your finger.

If your size is between two sizes, you'd better choose the larger one.

### TRY OUR RING SIZER

- 1) Cut out our ring sizer;
- 2) Cut along the dotted line in order to create a small slot;
- 3) Form a circle with the ring sizer by inserting the pointed end into the small slot;
- 4) Place the ring sizer on your finger and wrap it comfortably. Make sure you leave enough room for the ring to slide easily along the whole length of your finger;
- 5) Read your size. The Ring Sizer uses Italian sizing (Size IT).
